RE: Proposed Smoking Regulations

I don't think the Government should be involved. They are infringing on my right as an American to smoke. The choice of others not to smoke is also their right. Smoking has been banned in stores, banks, public buildings and restaurants.

I would tell OSHA the action to take would be to pass a Law that would allow us to smoke. This is not a dictatorship. We should be able to smoke and not be told what to do, we need to put this country back to the way it was. Return my rights.

Respectfully,

David Delaney
